

RAJAT SINGH

Email | +91-7838260050 | LinkedIn | GitHub | Portfolio

Professional Summary

Computer Science student and AI/full-stack developer with hands-on experience building, deploying, and shipping real-world AI applications and developer products. Proficient in Python, React, JavaScript, Node.js and C++, with experience across LangChain, PyTorch, FAISS, FastAPI, and React, and a strong foundation in data structures and algorithms

Key Projects

FrameForge (Manim Animation Generator) — React, FastAPI, Manim, Supabase

[GitHub](#) | [Demo](#)

- Reduced animation generation failures by 90% via an 8-pass auto-fixer pipeline (LaTeX substitution, deprecated API patching, AST validation) that intercepts and repairs LLM-generated Manim code before render.
- Cut average latency from 60s to under 2s for 9 high-frequency prompt types via a template cache with LLM intent verification, routing novel requests through a full Groq Llama 3.3 70B → validator → Supabase pipeline.

Document Grounded QA System — Python, LangChain, FAISS, Streamlit

[GitHub](#) | [Demo](#)

- Developed a RAG Q&A system processing 130+ page documents with 95% accuracy, <3s query latency, and 10,000+ chunk capacity using LangChain, FAISS vector store, and optimized chunking (1500/300 tokens) for 40% improved retrieval precision.
- Implemented custom prompt engineering reducing hallucinations by 60% and achieving 98% source attribution accuracy through retrieval-aware prompts and semantic search optimization.

Lockyt — Password Manager — React, firebase

[GitHub](#) | [Demo](#)

- Architected zero-knowledge encryption pipeline for Lockyt using AES-256-GCM client-side encryption and PBKDF2 key derivation (600,000 iterations), ensuring 0 bytes of plaintext are stored server-side across 5 vault item types.
- Built and shipped Lockyt's Chrome Extension (MV3) with sub-second autofill on any website, alongside a 4-dimension security center featuring breach detection, password strength analysis, reuse detection, and expiry alerts.

RAG Customer Support Chatbot — Python, SentenceTransformers, FAISS, Groq LLM

[GitHub](#) | [Demo](#)

- Architected a RAG-powered chatbot processing 27,000+ support queries with 90%+ accuracy using SentenceTransformer embeddings (all-MiniLM-L6-v2) and FAISS; implemented a hybrid response system with 0.80 similarity threshold, reducing LLM API calls by 60% while maintaining <2s latency.
- Optimized retrieval using 384-dimensional embeddings with logarithmic time complexity over 27,000+ vectors, achieving 95% context relevance with session-based chat history via Groq LLM (Gemma-2-9B-IT).

Experience

AI/Cloud Intern — IBM SkillsBuild

Jul 2025 – Aug 2025

Developed intelligent AI applications using IBM Watson, Watson Assistant, and IBM Cloud. Built conversational AI systems with context management, intent classification, and entity recognition. Integrated AI models with enterprise workflows and cloud infrastructure.

Design Lead — GDG on Campus, Dyal Singh College

Nov 2024 – Jun 2026

Led design direction for GDG on Campus events and initiatives, creating visual assets, branding, and promotional content to drive student engagement and event turnout.

Education

University of Delhi — M.Sc. Computer Science

2026 – Present

University of Delhi — BSc (Hons) Computer Science, 8.5 GPA

2022 – 2026

Class 12th — 95.2%

2022

Class 10th — 94.6%

2020

Technical Skills

Languages: Python, C++, JavaScript, SQL

Frontend: React.js, Vite, HTML5, CSS3, Tailwind CSS, Framer Motion

AI/ML & LLM: PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, LangChain, LangGraph, SentenceTransformers, FAISS

Backend & APIs: Node.js, Express.js, FastAPI, Flask, REST APIs, JWT, Socket.IO, Postman

Databases & Cloud: MongoDB, Supabase, AWS (EC2, S3), Firebase

DevOps & Tools: Docker, Kubernetes, Git, Linux, MLflow, Streamlit

Certificates

- Agentic AI Certified Foundations Associate, Oracle — 2026 [Credentials](#)
- Mastering Generative AI and ChatGPT, GeeksforGeeks — 2025 [Credentials](#)
- TensorFlow Developer Certification, GeeksforGeeks — 2025 [Credentials](#)

Achievements

- Solved 350+ Data Structures and Algorithms problems on [Leetcode](#)
- Solved 200+ Data Structures and Algorithms problems on [GeeksforGeeks](#)
